Subject: Operational improvements at Braun Road.

I was unable to attend the open house last night. Thank you for making the materials available for viewing online so quickly. I have one question. The first entry on page 3 if the presentation is an entry for "Phase 1 – Operational improvements at Braun Road" but I don't see any summary or schematics describing the Braun Road improvements. Can you describe these improvements please?

thank you,

Wayne Blough

Subject: stop this foolish waste of money on partial fixes!

Overpasses not 'super streets', untried and unproven, are the solution to 1604 congestion.

I oppose the waste of taxpayer money on these super streets. We want overpasses and we want them NOW!

Subject: Stop wasting time and resources

Many of us don't understand why it is so difficult to figure out a solution. If you have driven this stretch of road at any time of day, it is obvious that overpasses are needed at all the intersections, just like the rest of 1604 to the north and east. A superstreet is just going to continue to waste time and money that could be better spent creating overpasses. There is a huge median between the lanes that would be perfect for overpasses. Please use common sense and stop wasting so much time and money on solutions that aren't sufficient to alleviate the traffic.

I think we need overpasses not a super street on 281.

Subject: comments for 1604 superstreet - no Toll

Unfortunately I am unable to make the meeting tomorrow night (25 May) but would like to express my comments if I may. This is a band aid fix. What's needed are overpasses and to complete the controlled access highway through this section of 1604. Tolling this existing stretch of highway is not the solution and is opposed by the majority of the people.

Thank you,

George Heagerty

Importance: High

NO TOLLS ON 1604! Is that understood? Can you hear us? NO STEALING OF PUBLIC ROADS FOR PRIVATE PROFITS! PUBLIC USE MEANS FOR PUBLIC USE AND WHEN ROADS ARE PAID FOR WITH PUBLIC MONIES, IT BELONGS TO THE PUBLIC FOR THE PUBLIC INTEREST FOREVER!

Thank You!

The best solution is to install overpasses that can be use as 1604 is widen and improved.

Subject: SUPERSTREET OR SUPERSCAM?

Ladies and Gentlemen:

If the engineering and initial layout and grading hadn't yet been done at the intersection of Braun Road and Loop 1604, we might understand this tortured "fix" to the Loop 1604 gridlock from Bandera Road westward during morning and afternoon commute time. If you people hadn't done the job properly already at Culebra Road, we might still be able to "understand" your current plan. But when you really look at what's already been accomplished and the very little that remains to be done to completely and permanently FIX this gridlock problem which affects THOUSANDS of tax paying residents in an area that CONTINUES to be building new homes and subdivisions (authorized by the county, by the way), we have to wonder just what you folks are drinking at the cooler fountain.

All this SUPERSTREET

Subject: Traffic Problems on 1604 on Our Side of Town!

I always hear about the traffic problem at 281 and 1604, but I never hear about the the horrible traffic problems on 1604 between Braun Road and 151. I wish the media would report about the horrible traffic on our side of town.
