Response to Questions
February 9, 2010**

- 1. Would missing modules for debt service, employee benefits, and human resources – time allocation and payroll, fixed assets, contract compliance monitoring automatically preclude this solution from being considered?**

Absence of the aforementioned modules does not automatically preclude a solution from being considered; however, the functionality required for debt service accounting, time allocation, employee benefits, fixed assets, contract compliance monitoring are necessary components of the accounting system. Payroll is performed by a third party.
